EXPERIENCE

Nike (contract Kforce), Hybrid
Front-end Software Engineer | March 2024 - Present

Worked on a new Digital Marketing Technology team, building web experiments and integrating them with Adobe Target to load custom Javascript onto the e-commerce site.

Key Achievements:

- <u>UI Experimentation</u> -
    - Build custom A/B experiments using Typescript or with React framework.
    - Set up relevant experiments in Adobe Target returning JSON data for front-end consumption.
    - Capture relevant data on users who experience experiments.
    - Error handling with New Relic.
    - Create and update Unit tests for code.
- <u>3rd Party integration</u> -
    - Update current tools to use Adobe Target as the main analytics and experiment test suite.
- <u>Code Enhancements</u> -
    - Refactor major portions of code and folder structure to create a better developer experience for the team.

Driveway.com, Remote
Front-end Software Engineer | September 2021 - September 2023

Worked on key features and components for web applications, specializing in Cart flow using React.js and

Typescript. Participated in API integration, GraphQL queries, and third-party framework updates.

Key Achievements:

- Application Upgrade and Redesign -
  - Built global multi/single selector replacing an existing version throughout the application.
  - Removed a heavy 3rd party animation, replacing it with pure CSS transitions and animations.
  - Collaborated on creating a new Cart/Checkout experience including building multiple components.
  - Played a pivotal role in updating applications from MUI4 to MUI5.
  - Assisted in transition to Zustand for state management and React Query for API utility functions.
- E-Sales Flow Enhancements -
  - Successfully implemented the New Vehicle and Leasing Sales Flows, consuming (GET, POST, PUT) RESTful APIs for seamless vehicle sales.
- 3rd Party integration -
  - Contributed to project updating to a new third-party Taxes, Fees Framework adding additional fields with Front-end error validation and pulling data from a new API.
  - Updated integration of Chat feature, creating documentation on how to use.
- Team Collaboration -
  - Collaborated with QEs in creating E2E tests using Playwright and maintained unit tests for React components.
  - Assisted in PR reviews of team members' work.
  - Represented the Checkout Team during ceremonies, deployment, leagues, and product meetings.
  - Rotated as Developer on Pager Duty addressing and investigating issues.

CloudBolt Software, Portland, OR
Front-end Engineer | October 2019 - August 2021

Contributed to developing and enhancing features for CloudBolt, a cloud administrative software. Led the introduction of Jest. Unit testing, and modernized UI development using Python Webpack, Node.js, and Vue.js.

Key Achievements:

- Testing Advancement -
  - Introduced Jest Unit testing for Front-end testing.
  - Collaborated with the QE in adding proper data tags throughout the app to enhance automation.
- Dashboard improvements & navigation -
  - Enhanced main navigation for improved user experience and updating the design.
  - Collaborated on customizable dashboard using Vue.js and REST API endpoints.
  - Built a Guided Setup feature using Nuxt.js allowing users to quickly set up different cloud providers including MS Azure, Amazon Web, and VMware.
- Data Visualization -
  - Collaborated on introducing enhanced graphing using High Charts and Vue.js, offering users a better visual representation of cloud environment data.
- Legacy Maintenace -
  - Maintained and updated the legacy front-end code, improving accessibility and 508 compliance to meet client standards.

Collaboration:

- Client Management -
  - Assisted with customer success issues as an escalation expert.
- Team Development -
  - Collaborated closely with Design in the creation of new features.
  - Mentored other engineers through regular meetings and knowledge sharing on the front-end process and updates.

NWEA, Portland, OR
Front-end Engineer | September 2018 - June 2019

Contributed to development, refactoring, and customization of Front-end UI for Educational Testing Onboarding and Admin dashboard using Vue.js. Integrated company APIs and Salesforce with Axios.JS for async calls, created routes using Vue-Router, and utilized Vue-Bootstrap for component building.

VML, Kansas City, MO
Technology Specialist: Front-end Development | March 2017 - April 2018

Contributed to the development of United Academy and United Rentals. Integrating Vue.js into Drupal templates and providing custom styling.

__Redfuse Communications__, Kansas City, MO
Interactive Web Developer | August 2015 - October 2016

Contributed to the maintenance and development of Hill's Petfood, Hill's Vet, and Tom's of Maine product websites.

EDUCATION

__Johnson County Community College__, Overland Park, KS
Associates of Applied Science - Web Technologies | August 2013 - May 2015

__University of Kansas__, Lawrence, KS
Bachelor of General Studies - American Studies | August 2002 - December 2008
